

TAURUS TIG-DC-180A WELDING MACHINE – 220V

Description

The Taurus TIG DC 180A inverter is a robust, generator-friendly machine designed and manufactured for operation under demanding industrial conditions. The advanced power input system will detect and handle a voltage drop or a spike of up to 25%. This will not only safeguard the machine against damage resulting from erratic power supply, but will also ensure smooth, uninterrupted operation. The high-frequency ignition ensures professional ease of welding, high-quality welds, and creates a very soft start arc and maximum arc control. This obviates the need to touch the workpiece with the tungsten electrode. This offers a great advantage when welding thin material.

ACCESSORIES

- Earth clamp cable kit.
- Electrode cable kit.
- TIG torch.
- Argon flowmeter.

SPECIFICATION

DESCRIPTION

PRODUCT CODE	TA-TIG180M
MODEL	TIG180-M
RATED POWER SUPPLY INPUT FOR TIG	220V±25% SINGLE PHASE
DUTY CYCLE 40°C @ 10 MINUTES	35% @ 180A
OPEN CIRCUIT VOLTAGE	60V
WELDING CURRENT RANGE	10 – 180A
DIMENSIONS(mm) AND NET WEIGHT(kg)	465 x 270 x 345mm ? 10.2kg

Product Category

1. Taurus Machines
2. TIG Welding Machines

Date Created
10 Nov 2026
