

iCUT RESIN-FIBRE DISC

Description

iCUT abrasive range is engineered for those who demand performance without the premium price tag. Whether you are a high-volume industrial fabricator or a dedicated DIYer, our high-performance products deliver the perfect balance between longevity and precision. We know downtime is a hidden cost in the workshop, so we manufacture iCUT products to a high standard for fast, clean cuts and a smooth finish every time. With iCUT, you don't have to choose between your budget and industrial-grade reliability, all at a price that keeps your projects moving forward.

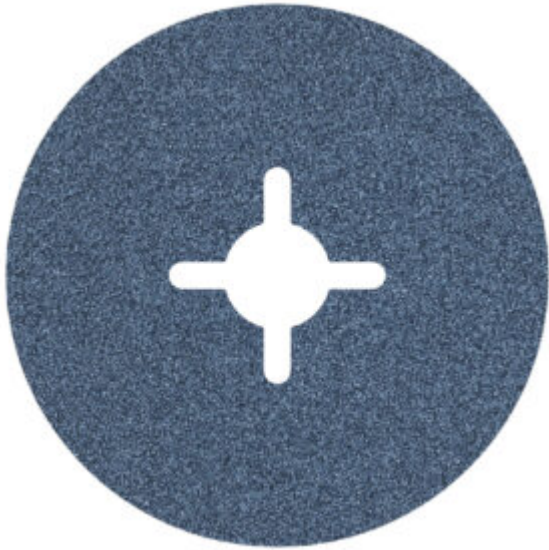

ALUMINIUM OXIDE

SOME KEY FEATURES

- Suitable for various materials such as steel, non-ferrous metal, aluminium, plastic and wood.

ZIRCONIA ALUMINA

SOME KEY FEATURES

- Compared to aluminium oxide discs, this disc can handle heavier loads.
- Ideally suited for use on various materials such as alloy steels, high-strength alloys, acid-resistant steel, stainless steel and non-ferrous metals.

BACKING PAD
