

MASTER CUT-RESISTANCE GLOVES

Description

Master Cut Resistant gloves are lightweight, have high mechanical strength with cut level five and PU coating which provides dexterity and grip. They have high tear-resistance properties for protection of the hands against abrasion, cuts and punchier hazards. These gloves are ideally suited for use in industries and risk-exposure areas where toughness and dexterity are required. Applied application areas include engineering, automotive, component assembly and warehousing. Available in sizes eight, nine and ten.

FEATURES

- 13g HPPE cut-fibre liner.
- PU coated smooth Palm finish.
- Level 5 high cut-resistance.
