

MASTER RUBBER GLOVES

Description

MASTER CRAYFISH GLOVE

Master crayfish gloves are fabricated from rubber-coated cotton which provide grip when handling slippery or abrasive objects while protecting the hands against cut, abrasion and puncture hazards. Applications include general handling, assembly, inspection, glass handling, the fishing industry and gardening.

FEATURES

- Cotton lining.
- Rubber coated palm and fingers.
- Excellent puncture resistance.

MASTER RUBBER BUILDER’S GLOVES

Master black rubber gloves are thicker than regular latex gloves ensuring better durability and providing protection against punctures and abrasion. Suitable for use in industrial, mining, construction, hardware and plumbing environments.

FEATURES

- 35cm in length.
- Smooth palm.
- Oil, acids and abrasion resistance.
