

TAURUS AUTO DARKENING SPECTACLE

Description

Taurus auto-darkening spectacles sense arc light from the welding process and electronically activate the liquid crystal filter resulting in darkening of the lens and thereby protecting the operator’s eyes from ultraviolet (UV) and infrared (IR) radiation. The spectacles are easy to use, sturdy and durable. Solar cell design obviates battery change.

REPLACEMENT AUTO-DARKENING PROTECTIVE LENS

The protective lens for the Taurus auto-darkening spectacles shields the auto-darkening lens from slag and spark damage.

Product Category

1. Eye Protection
