TAURUS CG1-30 STRAIGHT LINE CUTTER

Description

TAURUS CG1-30 STRAIGHT LINE CUTTER

The straight line cutter CG1-30 is a light, portable machine running on rails which can be extended to suit the cutting length. It uses oxygen-acetylene or oxygen-LPG. The traveling speed is adjustable enabling cutting through materials up to 100mm thick. Cutting nozzles ANME/ANM and PNME/PNM used on the universal cutting torch, can both be fitted to the machine.

If using oxygen-acetylene gas then use the following nozzles:

- ANM
- ANME

If using oxygen-LPG gas then use the following nozzles:

- PNM
- PNME

DESCRIPTION	VALUE
Voltage supply	220 V
Track length	1.8M
Track included	1
Track length extendable	Yes
Cutting thickness (mm)	6 – 100
Cutting speed (mm/min)	50 – 750

Product Category

1. Automated Cutter
