

TAURUS CLEAR MAGNIFICATION LENSES FOR FLIP FRONT HELMETS

Description

TAURUS CLEAR MAGNIFICATION LENSES FOR FLIP FRONT HELMETS

Taurus magnifying lenses are manufactured from durable, high-impact plastic material with a high resistance to cracking. The lenses are anti-reflective coated, reduce glare, optimise light transmission and facilitate a productive welding session. The magnified image enables the operator to create high-accuracy welds. Magnifying lenses easily fit into most flip-front welding helmets which use 108mm x 51mm size lenses.
