

TAURUS GOUGING CARBON

Description

TAURUS gouging carbon, also known as air-carbon arc cutting, is a metal removal process utilising the heat generated by an arc between a carbon electrode and the workpiece. Compressed air, directed through outlets on the torch, lifts molten metal away from the arc, preventing it from solidifying and consequently facilitating metal removal smoothly. Common applications are for weld-metal removal, back-gouging and reshaping torn metal.

REQUIRED EQUIPMENT

- Carbon electrodes.
- Gouging torch.
- MMA welder.
- Compressed air.

AVAILABLE IN

- 6.5 x 305mm (300 – 400A) – 50 piece pack
- 8.0 x 305mm (350 – 450A) – 50 piece pack
- 9.5 x 305mm (450 – 600A) – 50 piece pack

Product Category

1. Consumables
2. Gouging Carbon
