

TAURUS MIG 220K PORTABLE BENCH WELDER – 220V

Description

This Taurus MIG 220K welding machine is a high-performance semi-automatic portable, bench-top welding machine for CO₂ and mixed gas shielded welding. The advanced power input system will detect and handle a voltage drop or a spike of up to 10%. This will not only safeguard the machine against damage resulting from erratic power supply, but will also ensure smooth, uninterrupted operation. It can weld low-carbon steel, low-alloy steel, stainless steel, and other components. It uses 0.8-1.0 mm diameter stainless steel welding wire, steel wire, flux-cored wire, and other solid wire. It is portable and can be applied to fabrication and other industries. This MIG inverter welding machine has reasonable static characteristics, good dynamic performance, and optimal welding parameters.

ACCESSORIES

- Earth clamp cable kit.
- MIG torch.

- Argon flowmeter.
