

TAURUS MIG 350T-PRO COMPACT WITH CYLINDER TROLLEY WELDER – 380V

Description

This Taurus MIG 350T-PRO welding machine is a high-performance semi-automatic welding machine for CO₂ and mixed-gas shielded welding. The advanced power input system will detect and handle a voltage drop or a spike of up to 10%. This will not only safeguard the machine against damage resulting from erratic power supply, but will also ensure smooth, uninterrupted operation. It can weld low-carbon steel, low-alloy steel, stainless steel and other components. It uses 0.8-1.2 mm diameter stainless steel welding wire, steel wire, flux-cored wire and other solid wire. It is portable and can be applied to fabrication and other industries. This MIG inverter welding machine has reasonable static characteristics and good dynamic performance.

ACCESSORIES

- Earth clamp cable kit.
- MIG torch.
- Argon flowmeter.

- Cylinder trolley.
