

TAURUS MMA-250VRD HEAVY DUTY WELDER – 220V

Description

The TAURUS MMA 250VRD single phase, 220V stick-electrode welding machine is designed and manufactured to the latest digital-inverter technology for demanding industrial applications. It is a compact light-weight inverter machine which ensures a clean, high-quality weld and excels in basic and rutile electrode welding. Professional and DIY welders can experience the built-in characteristics of anti-stick, hot-start and arc-force. The advanced power input system will detect and handle a voltage drop or a spike of up to 25%. This will not only safeguard the machine against damage resulting from erratic power supply, but will also ensure smooth, uninterrupted operation. The VRD has an added safety function keeping the output voltage low (lowering the output voltage) when the machine is not in use.

ACCESSORIES

- Earth-clamp cable kit..
- Electrode-holder cable kit..
- Shoulder-strap.

OPTIONAL EXTRAS

- TIG torch.
- Argon flowmeter.

SPECIFICATION	DESCRIPTION
PRODUCT CODE	TA-MMA250VRD
MODEL	TA-MMA-250VRD
RATED POWER SUPPLY INPUT	220V±25% SINGLE PHASE
DUTY CYCLE 40°C @ 10 MINUTES8	100% @ 250A
OPEN CIRCUIT VOLTAGE	WITHOUT VRD (62V) ? WITH VRD (? 15V)
WELDING CURRENT RANGE	15 – 250A
ELECTRODE SIZE	2.0 – 5.0mm
DIMENSIONS(mm) AND NET WEIGHT(kg)	530 x 315 x 435mm ? 10kg

Product Category

1. ARC Welding Machines
2. Taurus Machines

Date Created
08 Oct 2025
