TAURUS PRO XP200A MIG TORCH

Description

The Taurus XP MIG torch is designed and manufactured for professional use. Serving performance, comfortable handling, and a long service life, and is manufactured from high-quality materials. The torch has a high duty cycle of 80% and its patented gas-flow technology ensures a cooler neck and tip, which, in turn, saves up to 70% on consumables and a reduction of welder’s downtime by up to 50%.

General checklist to assist with the selection of a MIG torch:

- Ensure the torch length is appropriate for the welding operation.
- Confirm that the torch connection will fit directly onto the machine.
- Use the correct-sized tip and liner for the welding wire size.
- The appropriate liner should be used for the filler wire material type.
- Ensure that the correct torch amperage for the application is available.

- Confirm that the duty cycle of the MIG torch selected is suitable for the application.

The Taurus XP200A MIG torch comes with the following;

- 1 x 200A (XP8) MIG torch
- 1 x Conical Nozzle/Shroud
- 1 x Gas diffuser
- 1 x 1.2mm M8 contact tip
- 1 x M8 tip adaptor/head assembly
- 1 x blue(4m)/red(3m) steel liner
