

TAURUS PRO XP350A MIG TORCH

Description

The Taurus XP MIG torch is designed and manufactured for professional use. Serving performance, comfortable handling, and a long service life, and is manufactured from high-quality materials. The torch has a high duty cycle of 80% and its patented gas-flow technology ensures a cooler neck and tip, which, in turn, saves up to 70% on consumables and a reduction of welder’s downtime by up to 50%.

General checklist to assist with the selection of a MIG torch:

- Ensure the torch length is appropriate for the welding operation.
- Confirm that the torch connection will fit directly onto the machine.
- Use the correct-sized tip and liner for the welding wire size.
- The appropriate liner should be used for the filler wire material type.
- Ensure that the correct torch amperage for the application is available.

- Confirm that the duty cycle of the MIG torch selected is suitable for the application.
